

Lessard-Sams Outdoor Heritage Council

Martin County DNR WMA Acquisition Phase 4
Laws of Minnesota 2020 Accomplishment Plan

General Information

Date: 03/15/2022

Project Title: Martin County DNR WMA Acquisition Phase 4

Funds Recommended: \$2,387,000

Legislative Citation: ML 2020, Ch. 104, Art. 1, Sec. 2, subd 2(f)

Appropriation Language: \$2,387,000 the second year is to the commissioner of natural resources for agreements to acquire lands in fee and restore and enhance strategic prairie grassland, wetland, and other wildlife habitat in Martin County for wildlife management under Minnesota Statutes, section 86A.05, subdivision 8. Of this amount, \$1,665,000 is to Fox Lake Conservation League Inc., \$618,000 is to Ducks Unlimited, and \$104,000 is to The Conservation Fund. A list of proposed acquisitions must be provided as part of the required accomplishment plan.

Manager Information

Manager's Name: Doug Hartke

Title:

Organization: Fox Lake Conservation League, Inc.

Address: PO Box 212

City: Sherburn, MN 56171

Email: dhartke@frontiernet.net

Office Number:

Mobile Number: 507-236-1700

Fax Number:

Website:

Location Information

County Location(s): Martin and Watonwan.

Eco regions in which work will take place:

- Prairie

Activity types:

- Protect in Fee

Priority resources addressed by activity:

- Wetlands
- Prairie

Narrative

Abstract

This program will continue our conservation partnership into Phase 4. We will continue to restore diverse prairie and wetland habitat in areas that adjoin existing MN DNR WMAs. Parcels are identified with representatives of local government, Windom Area MN DNR, Ducks Unlimited (DU), The Conservation Fund (TCF), the Fox Lake Conservation League, Inc. (FLCL), and other local partners. Wetland restoration and additional grasslands are needed to make our WMAs sustainable. We will use the real estate expertise of TCF, wetland and grassland restoration expertise of DU, and the efforts of the Fox Lake Conservation League to ensure success.

Design and Scope of Work

Selective project sites will be targeted by the habitat needs and land availability in areas adjacent to exiting WMAs, existing habitat and land already protected from development or other land use change. Work is designed to provide the most habitat value. The landscape will be restored as close as possible to conditions that existed prior to its conversion to agricultural production. Wetlands will be restored without the disruption of the natural drainage system. Native vegetation will be restored with a diverse range of species suitable to the landscape.

How does the plan address habitats that have significant value for wildlife species of greatest conservation need, and/or threatened or endangered species, and list targeted species?

This project will protect threatened habitats in Martin and Watonwan Counties. Native prairie and high quality wetland will be protected, buffered and expanded upon. Restoration sites will provide the opportunity to expand populations of at-risk and threatened plant species that Martin SWCD has propagated and introduced into permanently protected sites. The FLCL is continuing the work Martin SWCD initiated, by selecting additional locally rare at-risk species for propagation and use in this and future habitat restoration projects. While hundreds of Sullivant's milkweed (*Asclepias sullivantii*) and Tuberous Indian Plantain (*Cacalia tuberosa*) have been introduced into WMAs and other protected land, Small white lady's slipper (*Cypripedium candidum*) and Rattlesnake master (*Eryngium yuccifolium*) will continue to be propagated using local source plant material for use in this project. Parcels selected for this proposal expand habitat protection for the threatened Blanding's Turtle (*Emydoidea blandingii*) Perch Creek population that has been studied by the MN DNR and featured in the "MN Volunteer".

Describe how the plan uses science-based targeting that leverages or expands corridors and complexes, reduces fragmentation or protects areas identified in the MN County Biological Survey:

Our "Martin County Conservation Alliance" has grown into a planning group that includes wildlife group representatives, NGOs, local government, and state agencies. There is a wide range of knowledge and interest within the group. Historic information, the MN County Biologic Survey, and local knowledge help identify areas where habitat restoration will likely be most beneficial for multiple reasons. Expanding habitat adjacent to existing high quality native habitat and habitat already protected by public ownership or perpetual conservation easements are often targeted. Sites with threatened, endangered and species in decline are good targets to build upon, especially when these expansions can link sites to help extend corridors, expand blocks, and protect and enhance habitat buffers along water courses and lake chains.

Which two sections of the Minnesota Statewide Conservation and Preservation Plan are most applicable to this project?

- H5 Restore land, wetlands and wetland-associated watersheds
- H7 Keep water on the landscape

Which two other plans are addressed in this program?

- Long Range Duck Recovery Plan
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years

Which LSOHC section priorities are addressed in this program?

Prairie

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes

Does this program include leveraged funding?

No

Per MS 97A.056, Subd. 24, Please explain whether the request is supplanting or is a substitution for any previous funding that was not from a legacy fund and was used for the same purpose.

This proposal does not supplant or substitute previous funding for the same purpose.

Non-OHF Appropriations

Year	Source	Amount
2014	LCCMR	400000

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended?

Maintaining and improving this work after our restoration plans will be the responsibility of the MN DNR with support from project partner CPL grants if and when appropriate. Local Partners will continue to install additional local source native plant species to enhance habitat to support more species, including pollinators. Local Partner monitoring will assist with identifying invasive species threats and provide assistance with eradication or control when necessary.

Actions to Maintain Project Outcomes

Year	Source of Funds	Step 1	Step 2	Step 3
Ongoing	Local	Monitor to add local species	Monitor for invasive species	Treat and Plant as needed
Ongoing	Game and Fish Budget	Monitoring	Maintenance	Management

Activity Details

Requirements

If funded, this program will meet all applicable criteria set forth in MS 97A.056?

Yes

Will county board or other local government approval be formally sought** prior to acquisition, per 97A.056 subd 13(j)?

Yes

Is the land you plan to acquire (fee title) free of any other permanent protection?

Yes

Land Use

Will there be planting of any crop on OHF land purchased or restored in this program?

Yes

Explain what will be planted:

Soybeans or Oats may be planted in order to reduce fertilizer build-up and herbicide carry over from previous crop years. This will only be done to improve soil condition and provide a more suitable seedbed prior to restoring grasslands and wetland acres.

Are any of the crop types planted GMO treated?

True

Is this land currently open for hunting and fishing?

No

Will the land be open for hunting and fishing after completion?

Yes

Describe any variation from the State of Minnesota regulations:

All acquisitions will be part of the MN DNR WMA program and public hunting will be part of the process.

Who will eventually own the fee title land?

- State of MN

Land acquired in fee will be designated as a:

- WMA

What is the anticipated number of closed acquisitions (range is fine) you plan to accomplish with this appropriation?

We plan to close 2 to 3 acquisitions.

Are there currently trails or roads on any of the proposed acquisitions?

No

Will new trails or roads be developed or improved as a result of the OHF acquisition?

No

Will the acquired parcels be restored or enhanced within this appropriation?

Yes

Timeline

Activity Name	Estimated Completion Date
Begin acquisition negotiation	October 2020
Acquire properties	March 2021-March 2022
Begin restoration of properties	Fall 2021

Transfer properties to MN DNR	Fall 2021
Complete restorations	2022
Follow-up/maintenance/weed control	2023

Date of Final Report Submission: 12/20/2023

Budget

Budget reallocations up to 10% do not require an amendment to the Accomplishment Plan.

How will this program accommodate the reduced appropriation recommendation from the original proposed requested amount?

All budget items and acres were reduced proportionally to accommodate the recommended appropriation.

Contracts**What is included in the contracts line?**

Fox Lake contracts line includes expense for tree removal, potential building demolition, and parking lot construction. Ducks Unlimited contracts line includes expense for both wetland and prairie restoration.

Travel**Does the amount in the travel line include equipment/vehicle rental?**

Yes

Explain the amount in the travel line outside of traditional travel costs of mileage, food, and lodging

None

I understand and agree that lodging, meals, and mileage must comply with the current MMB Commissioner Plan:

No

Direct Support Services

How did you determine which portions of the Direct Support Services of your shared support services is direct to this program?

Fox Lake Conservation will not add for Direct Support Services.

TCF -Our real estate support staff keeps hourly time sheets to track direct time spent on projects by grant source. We have used those past metrics to estimate the costs for this grant.

DU - Minnesota DNR grants staff previously reviewed and approved DU accounting methodology for Direct Support Services, which are calculated and included in DU staff costs. DU Direct Support Services constitute approximately 10% of DU overall staff costs on average among DU conservation staff billing categories. DU breaks out and invoices for Direct Support Service expenses approved by DNR for reimbursement separately from Personnel expenses. In accordance with 2 CFR 200, DU uses the direct allocation method of allocating costs to programs and final cost objectives. This process of allocating costs is accomplished through the use of hourly rates. The direct cost of activities, including direct support expenses, is included in these hourly rates. The rates are comprised of costs for salaries, benefits, office space, general insurance, support staff, office supplies, and other various direct expenses incurred at the regional

offices and conservation department at the home office. All costs are assigned to conservation projects (net of applicable personnel and other costs that are non-conservation related.) Hourly charges represent the amount that DU charges conservation projects per hour for each staff member working on the project. These costs represent expenses that directly support the labor cost necessary for the development of a specific water/wetlands conservation project.

Federal Funds

Do you anticipate federal funds as a match for this program?

No

Target Lake/Stream/River Feet or Miles

Outcomes

Programs in prairie region:

- Key core parcels are protected for fish, game and other wildlife ~ *By adding these important parcels to the Martin County and Watonwan County WMA complexes we are adding valuable grasslands to the WMAs of Southern Minnesota. This additional diverse upland will provide much needed nesting habitat for our many wildlife species. This project will also add valuable acres for public hunting, fishing and other outdoor opportunities with all of the fish, game, and rare species that will be found on this new public land. The measurable habitat value will be based on the diversity of habitat protected and restored and the volume of public use these new acres receive.*

Parcels

For restoration and enhancement programs ONLY: Managers may add, delete, and substitute projects on this parcel list based upon need, readiness, cost, opportunity, and/or urgency so long as the substitute parcel/project forwards the constitutional objectives of this program in the Project Scope table of this accomplishment plan. The final accomplishment plan report will include the final parcel list.

Parcel Information

Sign-up Criteria?

No

Explain the process used to identify, prioritize, and select the parcels on your list:

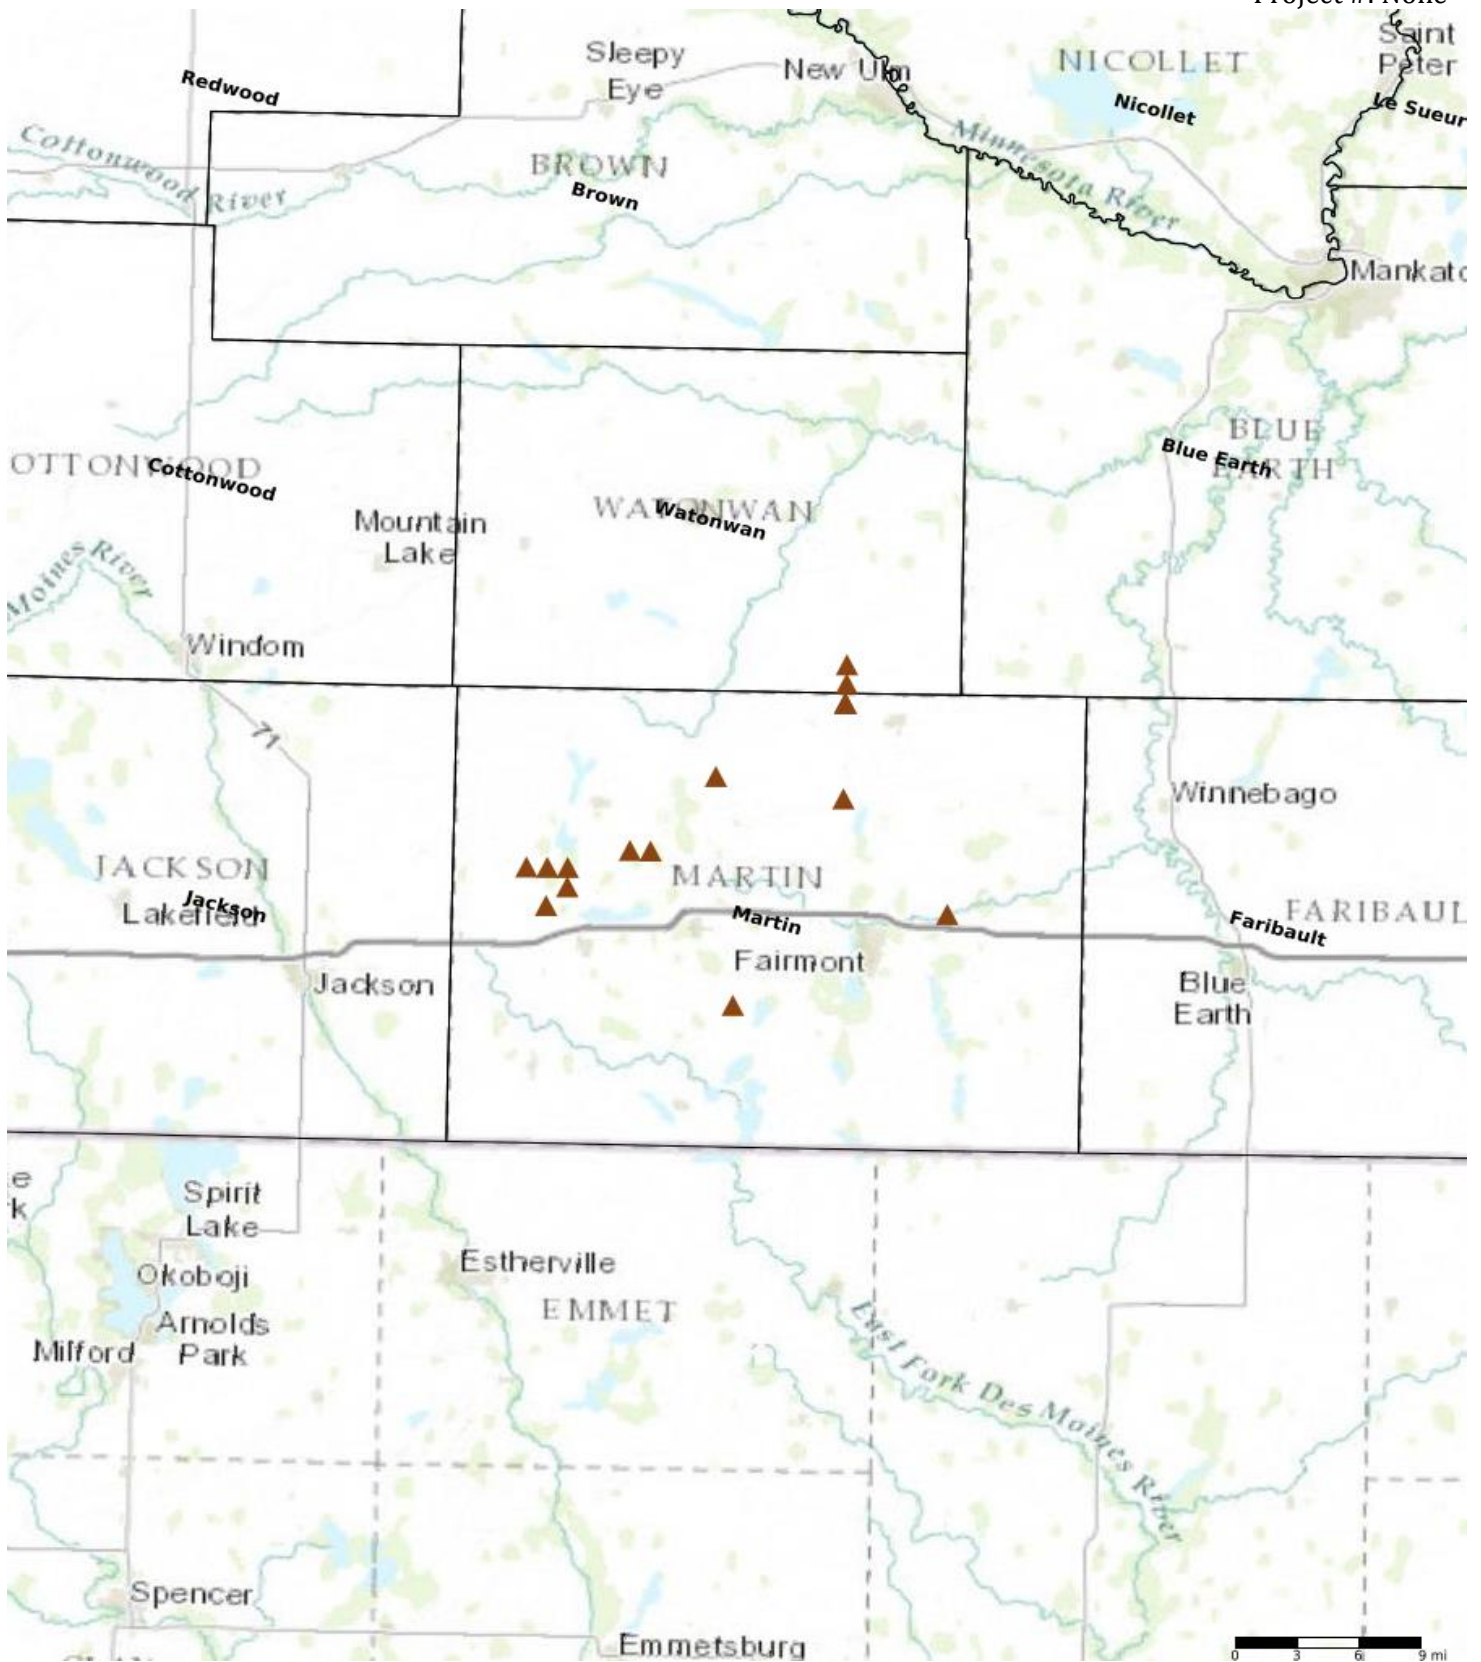

We work with the MN DNR to determine if parcel is an acceptable acquisition.
